RE: ANTS

I rang ACES on a Friday morning enquiring whether they could come inspect my property as it was crawling with ants- Owen quickly made a time for later that afternoon and came on time. He inspected the property and found 3 varieties of ants and suggested a plan of attack. He came back on Monday morning to do a full ant treatment and said to feel free to call him anytime should I need to (ie more ants came back or suddenly they converged on the house!). Very friendly and helpful and explained what he was doing/what the products were,

Super professional and highly responsive.

Thank you very much- would definitely recommend to anyone with an ant problem.
